High aEIR
Low aEIR
negative regulation of interferon−beta production
negative regulation of type I interferon production
interferon−beta production
regulation of interferon−beta production
antimicrobial humoral immune response mediated by antimicrobial peptide
regulation of type I interferon production
type I interferon production
response to type I interferon
negative regulation of innate immune response
regulation of macrophage derived foam cell differentiation
defense response to virus
regulation of innate immune response
interleukin−12−mediated signaling pathway
positive regulation of innate immune response
humoral immune response
cellular response to interleukin−12
regulation of leukocyte chemotaxis
leukocyte chemotaxis
myeloid leukocyte migration
regulation of leukocyte migration
positive regulation of inflammatory response
positive regulation of myeloid leukocyte differentiation
leukocyte migration
positive regulation of antigen receptor−mediated signaling pathway
regulation of T cell differentiation
positive regulation of leukocyte differentiation
inflammatory response
regulation of lymphocyte differentiation
regulation of leukocyte differentiation
T cell differentiation
positive regulation of myeloid cell differentiation
