negative regulation of innate immune response
regulation of innate immune response
regulation of leukocyte differentiation
positive regulation of myeloid cell differentiation
positive regulation of myeloid leukocyte differentiation
positive regulation of inflammatory response
T cell differentiation
positive regulation of innate immune response
positive regulation of leukocyte differentiation
inflammatory response
leukocyte chemotaxis
leukocyte migration
myeloid leukocyte migration
regulation of lymphocyte differentiation
regulation of T cell differentiation

regulation of macrophage derived foam cell differentiation
regulation of leukocyte chemotaxis
positive regulation of antigen receptor−mediated signaling pathway
regulation of leukocyte migration
interferon−beta production
negative regulation of interferon−beta production
interleukin−12−mediated signaling pathway
regulation of interferon−beta production
regulation of type I interferon production
humoral immune response
negative regulation of type I interferon production
cellular response to interleukin−12
type I interferon production
defense response to virus
antimicrobial humoral immune response mediated by antimicrobial peptide
